

August 30, 2011

Dear Sir/Madam,

The KAPP Group is proud to announce the first gear profile grinding machine for grinding gears up to a diameter of 8,000 mm.

We would be pleased to open the doors of our NILES ZP 80 for you before this machine is delivered to our customer. Therefore we invite you to Berlin for a special presentation any day between September 12 and 30, 2011.

We are also exhibiting at the EMO in Hannover, Germany, September 19 – 24, 2011. Perhaps a visit to Berlin can be arranged in conjunction to attending EMO.

With best regards,

KAPP Technologies  
Bill Miller  
Vice President Sales

NILES Werkzeugmaschinen GmbH  
Dr. Frank Reichel
